WWII

Vietnam

Continue the Mission

Life of an Army Part

Manufacture → Packaging

Shipped to DDSP → Stored at DDSP → Requisition

Shipped to ISSA → Stored at ISSA → Requisition

Shipped to Unit → Stored in ASL/PLL van

Deploy - ASL/PLL van transported → Redeploy - ASL/PLL van transported

Mechanic needs part → Pulled from ASL/PLL va

Army Packaging Needs

- **First entry point in CONUS is not where we use the parts or supplies.**
- **Parts arrival at the Fort may not be the final leg of it's journey.**
- **Using military packaging, we must protect the parts AMC provides the units because the Warfighters may not use the part for up to two years after they receive it.**
- **After two years in the back of an Authorized Stockage List (ASL)/Prescribed Load List (PLL) van or shelter and travelling around the world, the part will be handed over to the mechanic for installation-it must work!**
